

ANTI-LIGATURE INSTITUTIONAL MIRRORS – STAINLESS STEEL

180 Degree Half Face

The half dome is ideal for use in cells, day rooms, visitor areas, or any other area that requires wide area surveillance. It is also perfect at T-Junctions, eliminating blind spots around corners

- Virtually indestructible and unbreakable, stainless steel face.
- Powder coated steel anti-ligature frame with unique tamper-proof design.
- Bolts to wall and ceiling (fixings not supplied)

Dimensions – 500 x 250mm

90 Degree Quarter Face

The quarter dome should be corner mounted in cells and at right angle corners to provide 90° vision and prevent surprise attacks or collisions.

- Virtually indestructible and unbreakable, stainless steel face.
- Powder coated steel anti-ligature frame with unique tamper-proof design.
- Bolts to wall and ceiling (fixings not supplied)

Dimensions – 250 x 250mm

ANTI-LIGATURE INSTITUTIONAL MIRRORS – STAINLESS STEEL

360 Degree Ceiling Dome

When mounted directly to the ceiling this full dome mirror is ideal for use in cells, day rooms, visitor areas, or any other area that requires wide area surveillance.

- Virtually indestructible and unbreakable, stainless steel face.
- Bolts directly to the ceiling (fixings not supplied).

Dimensions – 500mm diameter

FIXING:The fixing flange/frame has 7mm countersunk holes. In addition to security screws, to achieve an anti-ligature installation we recommend the use of a pick resistant sealant — Arbokol 1025 or equivalent. The mirror/frame should be fixed onto a bed of the sealant and the same sealant used to finish the installation by filling any gaps and covering the screwheads completely.
